

Cey-System

The standard TAXI accounting system

The majority of the taxi owners already trust in the HALE Cey-System.
More than 10 taxi software producers also offer their programs on the basis of the HALE Cey-System.

● The Cey-System

The ideal accounting system for each taxi owner.
This complete solution from one competent source consists of few parts and does not require expensive additional appliances.

● The Cey-Contact

With the „Cey-Contact“ you extend your taximeter to the Cey-System, the modular system for accounting and administration of all trips and shifts.

Suitable for:

- Taximeter Microtax-06 and Microtax-05
- Mirror taximeter SPT-02 and SPT-01

● The Ceys

Data key with storage chip = CHIP + KEY = CEY

Trip data is stored from the taximeter in the chip of the HALE-Cey and so transferred from the taximeter to the PC.
The driven shifts are accounted and evaluated on the PC.

The following kinds of Ceys are available:

- Driver-Cey, green
- Owner-Cey, yellow

Your advantages

- Complete solution from one competent source
- No expensive additional appliances - only one Cey-Contact per taximeter and one driver-Cey per driver necessary
- Simplest mounting: mount, switch on - ready!
(cable pre-equipment at your mirror taximeter already existing!)
- Handy and robust driver-Cey for the bunch of keys
- Simple operation without time-consuming training
- Each driver registers with his Cey at start or end of shift
- Access to taximeter functions, which are blocked for the driver, through owner-Cey.
- In case of a driver-Cey getting lost, shift data and totalizers can be recalled with owner code.
- Fast and secured data transfer of all trips and shifts from the taximeter to the Cey and from the Cey to the PC. No data is lost!
- Tachograph memory for up to 30 shifts in the taximeter
- Clear trip protocol
- Recording of limit speed
- Recording of shifts between and shift survey
- Single and sum information
- Accounting of driver and owner data, either on the screen or printed
- Doubled data protection, protected data transfer without typing error
- Compact and robust Cey memories made of stainless steel guarantee trouble-free use without abrasion for years - even under extreme conditions!

Technical data

Chip memory	8 kByte memory capacity
Material	Memory of rustless steel Key of robust plastic
