The future in taxi.

HALE Datacenter – your
„Fleet Management Portal“

All data at a glance!

From planning and operational control to accounting – the HALE Datacenter is your smart organisational solution for all HALE taximeters.

Our data solutions for your business: Transparent and efficient.

The HALE Datacenter supports you in the day-to-day challenges of taxi operations with **three modular data solutions that build on one another**:

HALE BASIC makes it easy to manage your drivers and vehicles. Our basic data solution – specifically for single drivers – offers an initial introduction to operational data management.

With **HALE BUSINESS**, you have a clear overview of all your operating data at all times. Take advantage of the comprehensive viewing, editing and analysis options to get even more out of your business.

With **HALE PROFESSIONAL**, you also get special additional modules – e.g. Live tracking, Route information or Invoice trips. You can't ask for more – ideal for multi-car operators and fleets.

All solutions are easy to use, individually configurable – and **specially developed for the taxi business!**

Your advantage: Optional additional modules* – the customised solution tailored to your needs.

The HALE Datacenter has a modular structure. Use our additional modules to tailor your Fleet Management Portal even more precisely to your operational processes – step by step and individually.

From vehicle tracking and shift planning to recording vehicle costs: Our additional modules help you optimise your daily business processes!

* availability depends on country

** depending on the selected data solution

Shift events									
Trip type/Event	Begin	End	Fare	Extras	Total revenue	VAT rate	VAT	Empty distance	Occupied distance
Shift start	7/7/2025 12:27 AM	—	—	—	—	—	—	—	—
