

MEZ-06

The universal distance counter from HALE

The future in taxi.

With the new distance counter MEZ-06 HALE offers a universal device – usable from road construction to rallying!

MEZ-06 is available in two different versions – as a pure distance counter but also additionally with speedometer function.

Version 1: MEZ-06 as a pure distance counter

As a pure distance counter MEZ-06 offers the following features:

- ▶ For measuring two independent counters are available. Both can be set to 0 independently.
- ▶ The main counter may count forward, reverse or be stopped and can be pre-set. The secondary counter is counting forward only.

Version 2: MEZ-06 with speedometer function

This model provides useful additional features:

- ▶ The main counter may be used either for total distance or part distance.*
- ▶ The secondary counter shows the speed of the vehicle instead of the distance – optionally in km/h or m/min.

* counting forward only

More benefits

- ▶ Simple mounting and calibration
- ▶ Ideal size of 159 x 55 x 19 mm
- ▶ Precision: 1 m, depending on the characteristic coefficient of the vehicle

Variety of applications

- ▶ Distance counter for road maintenance, land register preparation
- ▶ Accounting for road construction companies and road marking companies
- ▶ Rallye cars etc.

Technical data

Operating voltage	8 V - 18 V, reverse polarity protection
Operating current	max. 320 mA, off mode < 350 µA
Operating temperature	-25° C to +85° C / -22° F to +185° F
Weight	125g
Dimensions (W x H x D)	159 x 55 x 19 mm / 6.26 x 2.17 x 0.75 inch
